To Whom it May Concern;

Dr. Ana Margarita Mendoza Burgos has been known to me for the three years I have resided in El Salvador. During that time and for some years before, she has been a resource for the U.S. Embassy community in matters dealing with adult and juvenile mental health. The bilingual capability she possesses coupled with her extensive formal training and practical experience strongly contribute to her ability to assist expatriates with societal adjustment and mental health issues. Dr. Burgos is a warm and engaging individual who quickly gains the confidence of patients and associates. The professional concern she demonstrates enables her to counsel and guide patients to a healthier state.

I have also noted the professional recognition Dr. Burgos has attained in this country. On several occasions, she has been highlighted in the press as a consummate professional, especially in the area of child psychology. She has also been honored by the Government of El Salvador for her excellent work. I highly recommend her to any prospective employer, especially for professional work among Latin communities. I may be contacted at any time to discuss this recommendation at (503) 2501-3440.

Sincerely,

Larry H. Brady

Director, USAID/El Salvador
